

	Ingestion	Ingestion Do NOT induce vomiting. Consult a physician.			
SECTION 5: FIREFIGHTING MEASURES					
5.1 Suitable (& unsuitable) extinguishing methods	Water spray, foam, dry chemical, carbon dioxide (CO_2)				
5.2 Specific hazards arising from the chemical	NFPA Class IIIB combustible liquid				
5.3 Special protective equipment & precautions for firefighters	 In the event of fire, wear self-contained breathing apparatus Keep containers and surroundings cool with water 				
SECTION 6. ACCIDENTAL DELEASE MEAS	spray SIIDES				
6 1 Personal & environmental	JURES				
precautions, protective equipment & emergency procedures					
6.2 Methods & materials for containment & cleanup	Evacuate the area and eliminate all sources of ignition. Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).				
SECTION 7: HANDLING & STORAGE					
	Safe handling advice		Ensure all equipment is electrically grounded before beginning transfer operations.		
7.1 Safe handling & storage precautions, including incompatibilities	Storage/Transport pressure		Ambient		
	Load/Unload temperature		Ambient, above freezing point. (Product will freeze at 4°C)		
SECTION 8: EXPOSURE CONTROLS/PERS	SONAL PRO	TECTION	N		
8.1 Control parameters based on OSHA'a permissible exposure limits (PEL's) & OSHA's threshold limit values (TLV's)	Contains no substances with occupational exposure limit values., Sasol Chemicals (USA) LLC recommends an internal limit of 5 mg/m3 (8-hour TWA) for exposure to mists of this product.				
8.2 Appropriate engineering controls	Air contaminant levels should be controlled below the PEL or TLV for this product (see Exposure Guidelines).				
8.3 Personal protection measures & protective equipment recommendations	Eyes Skin	Wear as appropriate: Goggles, Face-shield Wear suitable protective clothing, gloves and eye/face protection.			
	Inhalation	except in emergencies or when conditions cause excessive airborne levels of mists or			

vapors. Use NIOSH approved respiratory protection.

SECTION 9: PHYSICAL & CHEMICAL PROPERTIES					
9.1 Physical & chemical properties					
Appearance	liquid;				
Color	water-white, oily				
Form	liquid				
Odor	Hydrocarbons				
Odor Threshold	no data available				
Flash point	118 °C, 244 °F; PM;				
Flammability	Upper explosion limit: 4.7 %(V)				
	Lower explosion limit: 0.5 %(V)				
Boiling point/boiling range	248 - 284 °C, 478 - 544 °F; ASTM D-86;				
Melting point/range	4 °C, 39 °F; (Freeze pt.)				
Auto-ignition temperature	204 °C, 400 °F;				
Decomposition temperature	no data available				
Flammability (solid, gas)	no data available				
Vapor pressure	< 0.1 mm Hg @ 20 °C, 68 °F; API Calculation;				
Vapor density	7.1				
Density	no data available				
Specific gravity	0.768 @16 °C, 61 °F;				
Water solubility	negligible				
Viscosity	2.3 - 2.5 cSt @ 40 °C, 104 °F;				
pH	no data available				
Evaporation rate	no data available				
Partition coefficient: n-octanol/water	no data available				
SECTION 10: STABILITY & REACTIVITY					
•	No decomposition if stored & applied as directed				
•	Stable under recommended storage conditions				
10.1 Lists chemical stability & possibility	Combustion products include carbon dioxide, carbon				
of hazardous reactions	monoxide and possibly other unidentified organic				
	compounds				
10.2 Conditions to avoid Ke	ep away from heat & sources of ignition				
10.3 Incompatible materials Ox	kidizing agents				
10.4 Hazardous decomposition products No	one known				
SECTION 11: TOXICOLOGICAL INFORMATIC	N				
11.1 Routes of exposure; related symptoms, a	cute & chronic effects, numeral measures of				
toxicity					
Acute dermal toxicity LD50 rabbit:	> 2,000 mg/kg				
Acute inhalation toxicity LC50 rat (4 h	ours): > 5.8 ma/l				
Acute oral toxicity LD50 rat: > 2	2.000 ma/ka				
Skin (rabbit)					
corrosion /irritation Deposted ov	orrosion/irritation Repeated exposure may cause skin dryness or cracking				
	Drimony irritation (rabbit), 1 hourse 5.7 (May, access in 110.)				
Eye uamaye/irritation Primary irrita	amage/irritation Primary irritation (rabbit): 1 hours; 5./ (Max. score is 110.)				

	(unwashed eyes), Not irritating
Respiratory or skin sensitization	no data available
	Genotoxicity in vitro:
	no data available
Germ cell mutagenicity	Genotoxicity in vivo:
	no data available
	Assessment Mutagenicity:
	no data available
	Reproductive toxicity:
	no data available
	Assessment Reproductive toxicity:
Reproductive toxicity	no data available
	Teratogenicity:
	no data available
	Assessment teratogenicity:
	no data available
STOT - single exposure	no data available
STOT - repeated exposure	no data available
Aspiration toxicity	May be fatal if swallowed and enters airways.
Carcinogenicity	Assessment carcinogenicity:
	Contains no ingredient listed as a carcinogen
	ΟΡΜΑΤΙΩΝ
SECTION 12: ECOLOGICAL INFO	
12.1 Ecological Information	
12.1 Ecological Information	Not toxic to aquatic organisms (fish, daphnia, algae) up to water
12.1 Ecological Information Aquatic toxicity	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility.
12.1 Ecological Information Aquatic toxicity	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility. LL50 (Pimephales promelas (fathead minnow)) 96 hours
12:1 Ecological Information Aquatic toxicity Toxicity to fish	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility. LL50 (Pimephales promelas (fathead minnow)) 96 hours In the range of water solubility not toxic under test conditions
SECTION 12: ECOLOGICAL INFO 12.1 Ecological Information Aquatic toxicity Toxicity to fish	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility. LL50 (Pimephales promelas (fathead minnow)) 96 hours In the range of water solubility not toxic under test conditions EL50 (Ceriodaphnia Dubia (water flea)) 192 hours
SECTION 12: ECOLOGICAL INFO 12.1 Ecological Information Aquatic toxicity Toxicity to fish Toxicity to aquatic invertebrates	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility. LL50 (Pimephales promelas (fathead minnow)) 96 hours In the range of water solubility not toxic under test conditions EL50 (Ceriodaphnia Dubia (water flea)) 192 hours In the range of water solubility not toxic under test conditions.
SECTION 12: ECOLOGICAL INFO 12.1 Ecological Information Aquatic toxicity Toxicity to fish Toxicity to aquatic invertebrates Toxicity to algae	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility. LL50 (Pimephales promelas (fathead minnow)) 96 hours In the range of water solubility not toxic under test conditions EL50 (Ceriodaphnia Dubia (water flea)) 192 hours In the range of water solubility not toxic under test conditions. no data available
SECTION 12: ECOLOGICAL INFO 12.1 Ecological Information Aquatic toxicity Toxicity to fish Toxicity to aquatic invertebrates Toxicity to algae Chronic toxicity to fish	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility. LL50 (Pimephales promelas (fathead minnow)) 96 hours In the range of water solubility not toxic under test conditions EL50 (Ceriodaphnia Dubia (water flea)) 192 hours In the range of water solubility not toxic under test conditions. no data available no data available
12.1 Ecological Information Aquatic toxicity Toxicity to fish Toxicity to aquatic invertebrates Toxicity to algae Chronic toxicity to fish Chronic toxicity to aquatic	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility. LL50 (Pimephales promelas (fathead minnow)) 96 hours In the range of water solubility not toxic under test conditions EL50 (Ceriodaphnia Dubia (water flea)) 192 hours In the range of water solubility not toxic under test conditions. no data available no data available no data available
SECTION 12: ECOLOGICAL INFO 12.1 Ecological Information Aquatic toxicity Toxicity to fish Toxicity to aquatic invertebrates Toxicity to algae Chronic toxicity to fish Chronic toxicity to aquatic invertebrates	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility. LL50 (Pimephales promelas (fathead minnow)) 96 hours In the range of water solubility not toxic under test conditions EL50 (Ceriodaphnia Dubia (water flea)) 192 hours In the range of water solubility not toxic under test conditions. no data available no data available no data available
SECTION 12: ECOLOGICAL INFO 12.1 Ecological Information Aquatic toxicity Toxicity to fish Toxicity to aquatic invertebrates Toxicity to algae Chronic toxicity to fish Chronic toxicity to aquatic invertebrates	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility. LL50 (Pimephales promelas (fathead minnow)) 96 hours In the range of water solubility not toxic under test conditions EL50 (Ceriodaphnia Dubia (water flea)) 192 hours In the range of water solubility not toxic under test conditions. no data available no data available no data available Readily biodegradable.
SECTION 12: ECOLOGICAL INFO 12.1 Ecological Information Aquatic toxicity Toxicity to fish Toxicity to aquatic invertebrates Toxicity to algae Chronic toxicity to fish Chronic toxicity to aquatic invertebrates Biodegradation	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility. LL50 (Pimephales promelas (fathead minnow)) 96 hours In the range of water solubility not toxic under test conditions EL50 (Ceriodaphnia Dubia (water flea)) 192 hours In the range of water solubility not toxic under test conditions. no data available no data available no data available Readily biodegradable. OECD Test Guideline 301F (28 d): 82 %
SECTION 12: ECOLOGICAL INFO 12.1 Ecological Information Aquatic toxicity Toxicity to fish Toxicity to aquatic invertebrates Toxicity to algae Chronic toxicity to algae Chronic toxicity to fish Chronic toxicity to aquatic invertebrates Biodegradation	Not toxic to aquatic organisms (fish, daphnia, algae) up to water solubility.
